

For Immediate release:

New Level Design Brings Added Features To Contractors and Do-It-Yourselfers Alike

Minneapolis, MN, Monday, April 28, 2008 - SLK Development Group, LLC is proud to announce its introduction of the Level Best² into the hardware industry. The Level Best² is a four-in-one multi-purpose tool with the ability to accurately measure level and plumb at the same time. Made from highly durable polystyrene, this tool encompasses two opposing level bubbles and a perfect 90° angle. It also features a ruler and pencil slot for easy measurements.

In the past, contractors and do-it-yourselfers would need to use multiple tools to achieve the kind of results this tool will provide. This new design will simplify building and home improvement projects. It is a “must have” for both the expert and the novice. It is specifically designed to help with the building of stairs, the installation of doors and window frames and laying foundations. It is also great for hanging shelving, building decks, installing cabinets and even hanging the perfect picture.

This tool is a great addition to anyone’s toolbox - Contractors, inspectors, carpenters, masons and of course do-it-yourselfers.

SLK Development Group, LLC is a company entirely run by women. The business experience of its president, Stephannie Keller includes owning and operating several Pearle Vision stores for more than 17 years. Two of the stores ranked in the top ten out of 850 nationwide locations and generated revenue in excess of \$5 mm. She and her associates have worked together for more than 14 years. Together they have managed large systems in both the manufacturing and retail sides of the optical industry.

The original inventor of the tool, Larry Paul has been a General Contractor for more than 25 years and specializes in building executive homes in Minnesota and Wisconsin.
